

## PREPARATION FOR CMS CERTIFICATION SURVEY

Whether your facility is a critical access hospital or a large medical center, QHR can help you prepare for a CMS Certification Survey. Tailored to your needs, QHR consultants conduct an on-site review, providing a "rehearsal" and readiness assessment for the survey by conducting interviews, observing care delivery and reviewing documents. QHR consultants assess performance of organizational patient-focused functions and processes, which are required for certification.

The organization's application of the Medicare Conditions of Participation is assessed through reviewing or observing:

- Required policies/procedures
- Contract service agreements
- Medical staff credential files
- Employee files
- Patient care
- Physical plant and compliance to the Life Safety Code requirements
- Open and closed medical records
- Committee meeting minutes

Within 30 days of the on-site engagement, QHR provides a report which will allow you to prioritize your preparation efforts and improve compliance for better results.
