

REVENUE CYCLE SOLUTIONS

Every year, you face new changes and complexities to healthcare regulations, reimbursement, and payor contracts. All eyes are on you to maintain timely and accurate reimbursement and avoid any slip in cash flow. Staying on top of your game isn't easy.

QHR Revenue Cycle Solutions can keep you there. Our experts have in-depth technical knowledge and operational understanding of the revenue cycle - beyond the business office. And we approach revenue cycle performance improvement as a cyclical process, not a destination. QHR delivers the prompt achievements you expect and the continuing support vital to sustainable performance.

Enlightened Solutions Move Hospitals from Good to Great—QHR consultants reach across hospital department boundaries (PFS, HIM, Reimbursement, Case Management, Managed Care, Coding/Chargemaster, Systems Support), zeroing in on the process issues of cash flow problems instead of simply treating the symptoms.

We perfect the linkages among these areas to fine tune your cash flow and take your process from good to great. QHR's analysis of the revenue cycle is the most comprehensive in the industry and so are our solutions.

Education is Fundamental to Sustainable

Performance—QHR helps clients achieve long term results by training hospital staff to understand the revenue cycle and continue the cycle of performance improvement. We train staff on-site before revenue cycle implementation, and follow through with web-based support after implementation. Our revenue cycle process is unique and sustainable because we monitor and maintain your staff's new competency levels and keep their knowledge current through the QHR Learning Institute.

Reporting Tools and Monitoring—QHR Revenue Cycle Solutions creates dashboard reporting systems to provide easy access to the information your staff needs to manage the revenue cycle process. This system also provides detailed reports, allowing middle and senior level management to identify trends and help remove barriers before they become issues.
